

TABLEROCK TECHNOLOGIES

AS SOLID AS OUR NAME

Design

Tablerock Technologies, LLC. designs each installation to your specific needs and budget. We help you analyze and select the best technology for your project. Factors may include:

- Your site details including orientation to the sun, present and future site shading, accessibility and proximity to related utilities.
- Your technology options: including durability, cost, ease of maintenance and life expectancy

Our goal is for you to get the best performance from a system that meets your unique needs.

Palmetto Health, Richland Hospital

Installation

We use quality materials to install your new system and we do it right the first time. We take pride in our work and pay attention to the details that guarantee your system will be up and running quickly, efficiently, and worry-free. Ask any of our satisfied customers!

Consultations

We provide consultation services such as site assessment, design consults, and technical support for your home or business.

Repair & Maintenance

We service what we sell! Tablerock Technologies, LLC. is a full-service company, and we are here for you after the installation. We offer system inspections, annual preventative maintenance and panel cleaning services to help keep your renewable energy system running at peak performance. Tablerock Technologies, LLC. also performs "remove and replace" of solar panels so roofing materials can be replaced.

Respected Brands Quality Service

SOLAR POWER FOR EVERYONE

It's not just a catchy phrase or high hope. Tablerock Technologies, LLC. is making affordable, green energy a reality for thousands. If you thought solar power was out of reach, think again. Today's solar products and designs mean you can get started now with costs no higher than those you'd expect from more traditional systems. Best of all, solar pays for itself over time and recent tax incentives federally may be matched in your state, making this the perfect time to

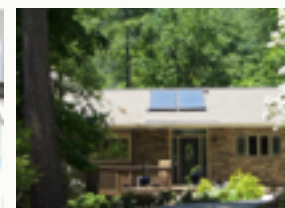

GO GREEN WITH SOLAR.

RESIDENTIAL

Did you know that as much as 50% of residential energy costs are directly related to the hot water heating system? Tablerock Technologies, LLC. works with many of the premier providers of hot water systems powered through solar. Homeowners can reduce energy costs immediately. Best of all, state and federal tax incentives make "going solar" very affordable from the start. Call for a site inspection today to see if you can begin saving! Don't forget to ask about solar for your swimming pool!

Residential hot water system installation.

Residential panels for hot water system installation.

COMMUNITY

Tablerock Technologies, LLC. has worked with many community agencies to design and install functional, esthetically beautiful designs for pools, parks, ball fields, green areas and recreation facilities. Tablerock's professional staff works with project managers to determine the best products and designs available for reducing future energy costs and meeting ever increasing demands for services, reliably.

Arthur W. Christopher Community Center

CORPORATE

Increasingly, business leaders are looking for green solutions that speak to the bottom line, promote productivity through the health and well-being of their employees and enhance the functionality of their facilities. Let Tablerock Technologies, LLC. demonstrate the many ways your business can "go green." Take advantage of government incentives for business while achieving concrete results in facility planning and financial management.
